

# SAP Data Volume Reductions

## SAP S/4HANA and Beyond

Reduce the cost of your SAP landscape by solving problems caused by non-compliant, obsolete, and aged data with **Information Lifecycle Governance (ILG)**:

- Reduce footprint and IT Data Debt for SAP S/4HANA
- Improve Performance and User Experience
- Ensure Information Governance is Controlled and Minimizes e-discovery Costs and Risks

ILG aligns People, Policy, and Processes to ensure data value balances risk and cost. This one simple idea of alignment is often the most challenging to define and translate into a use case and ROI.

From initial assessment through full-service deployment and expert managed services, we deliver unequalled decision and solution support.

Starting with our assessment and blueprint, we identify and transparently present the most pertinent information for your use case with a clearly defined and actionable set of priorities to mobilize and meet your goals with reducing data volumes.

### Control of Your Data Volume = Real Savings

#### Short on time and resources?

With minimal participation from your busy resources, Vortex's team of experts can deliver a comprehensive assessment and blueprint, then jump-start data volume management in **6 short weeks!**

Here are just a few of the deliverables available:

- ✓ Deep-dive analysis beyond the usual database growth and sizing statistics
- ✓ Outline of in-house, cost-effective tools available in your existing environment, relatable to actual business need
- ✓ Use case document: recommended project scope options, sequencing, timelines, correlation to volume benefit, and project resource plan
- ✓ Turnkey data volume management deployment of gray matter data (which admin teams usually won't touch)

- Decades of experience in SAP integration, data archiving, DART technologies
- Expertise in SAP S/4HANA
- Successful results across multiple industries and markets
- ILG Program Start-Up
- Project Management
- Managed Services
- Legacy System Decommissioning
- Content Services Migrations
- Markets: U.S. and Canada
